Hold your equity managers accountable

HOLDINGS ANALYSIS

Your equity managers may deconstruct their returns to report attribution, but attribution doesn’t explain how their decisions differ from those of other managers. Use Holdings Analysis to pinpoint where your equity managers are demonstrating independent thinking with stock selections notably different from their peers. Also analyze their sector, region and style allocations to validate that they’re following their stated investment philosophy or uncover potential style drift.

**USE HOLDINGS ANALYSIS TO**

**Know the questions to ask.**
Prepare for meetings with your equity managers by analyzing their allocation decisions, stock selections and holdings weights in advance. This background data will help you ask better questions and get more insight into your managers’ thought process.

**Get behind headline numbers.**
Most top-quartile managers are delivering similar performance. What differentiates one manager from another is how they’re delivering returns. Holdings Analysis is key to holding your managers accountable for following their stated philosophies and process.

**Be an interactive partner.**
Whether you’re an in-house investment team or work with a consultant, Holdings Analysis helps you interact with managers as a partner and get behind their headline updates.

**Step up to Investor Pro because your tools should be as good as you are.**

**Holdings Analysis +**
- The most influential database of institutional managers in the world
- Analytics tools for comparing and ranking managers and conducting what-if simulations
- A searchable document library with intelligence on the fees other investors are paying, consultant recommendations and thousands of manager ratings by other investors and consultants
- A centralized, searchable and auditable repository for all your manager research documents, notes, emails, ratings and reviews

HOLDINGS ANALYSIS

Technical Brief

eVestment Holdings Analysis deconstructs equity manager performance versus not only benchmarks, but also peer averages. This provides insight into where the portfolio team’s decisions are typical of other active peers and where the team demonstrates more independent thinking about sector, region and style allocations. This intelligence equips investors to ask more informed questions of their equity managers. Holdings Analysis can also be used to validate a team’s discipline around its stated process or, conversely, to detect style drift.

Capabilities

Allocations vs. Peers

Understand how the product portfolio allocations differ from an average portfolio in the universe.

Impact of Stock Selection

View the top contributors and detractors to performance.
HOLDINGS ANALYSIS

Portfolio Characteristics vs. Peers
Understand how product portfolio characteristics differ from those of an average peer portfolio.

Allocations Over Time
