

Global Database Overview

With over 47,000 traditional long-only vehicles and over 28,000 alternative strategies, the breadth and depth of institutional coverage of the eVestment Global Database is unmatched.

Our database questionnaire was developed in conjunction with leading consultants to ensure relevance well beyond performance. Clients are able to screen across over 2,800 unique traditional and alternative data fields.

We also employ a worldwide in-house team of data collection experts who actively pursue new managers and maintain data points for existing managers. The team's sole focus is the collection and quality assurance of all data gathered from institutional asset managers.
