

Dear Sir/Madam,

As you likely know, Frontier Advisors has been leveraging eVestment Alliance's global database and analytics platform for the last couple years. eVestment has become an important component of our manager research for firms based outside of Australia. It is used by Frontier as a key source of quantitative investment manager data. This data and eVestment's tools aid our manager research, search/selection, and ongoing monitoring exercises.

**Importantly, we are now working to embed the database into our Australian-based manager research process.** As such, we strongly encourage all managers to fully populate the eVestment database. Our goal is to streamline data requests so that we can more heavily rely on eVestment for Australian specific mandates. This is a win-win for both our organisation as well as asset managers as this will reduce the ad hoc requests that you receive from Frontier. We would very much appreciate full support and population of eVestment so we can reduce these requests and instead rely on the eVestment platform for this factual and commodity type information. We would note that timely and accurate data submission will better allow us to assess the merits of manager meeting requests and to expedite our ratings process.

We believe that eVestment's expansion brings tremendous potential for the industry at large by serving as a central platform to reduce ad-hoc asset consultant requests, thereby reducing the data burden for investment managers. *Please note: eVestment does not charge a fee to submit data.*

We look forward to further drawing on eVestment's database and technology in Australia and thank you for supporting their efforts. Please feel free to contact us with any questions or reach out directly to eVestment by contacting: James Metcalfe, T: (02) 8211 2717, Client Service, E: [australia@evestment.com](mailto:australia@evestment.com),

Respectfully,

Leigh Gavin
